NHSBSP EQUIPMENT EVALUATION (FORM 9)

Assessment of Image Quality of Clinical Films by Radiologist or Film Reader

This form may be used to grade different aspects of image quality for a sample of images produced by the system under evaluation.

Grade **exposure** and **contrast** on a sliding scale from 1 to 5, where 1 = inadequate, 2 = poor, 3 = satisfactory, 4 = good, 5 = excellent.

Grade **sharpness** on a sliding scale from 1 to 5, where 1 = blurred, 3 = satisfactory, 5 = sharp.

Grade **overall image** on a sliding scale from 1 to 5, where 1 = inadequate, 2 = poor, 3 = satisfactory, 4 = good, 5 = excellent.

Grade **breast composition,** where F = fatty, M = mixed, D = dense.

Name	Number	Date	Exposure	Contrast	Sharpness	Composition	Overall
